After the FUNCTION of the room has been handled, it's time for the fun part. This is where personality comes into play, adding the jewelry for the room, if you will. Draperies, Top Treatments and so much more. It is where design begins and BORING ends.

Here's to the fierce, the brave and adventurous ones; those unafraid to design with pure, unadulterated passion.

The role of the designer is that of a very good,
thoughtful host anticipating the needs of his guests.
~ CHARLES EAMES

The essence of interior design will always be about
people and how they live. It is about the realities of
what makes for an attractive, civilized, meaningful
environment. Not about fashion or what's in or what's
out. This is not an easy job.

~ ALBERT HADLEY

The details are not the details. They make the design.

Have nothing in your house which you do not know
to be useful or believe to be beautiful.

½" floor clearance

This is the standard for most drapery installations and works best with fabrics that hang well or have a good "hand".

This mounting technique gives a clean, tailored look and helps "tame" the tendency to flair.

Texture

Don't forget the feel, or "hand" of a fabric is very important. Touch those textiles! They aren't just for looks. Even a room rich with color will feel as if something is missing unless texture and/or pattern play a role.
